The next generation Lloyd's List Intelligence platform has been completely re-designed to bring you the information you need within a fast, flexible, interactive interface.

- 1 To search for vessels, simply select the "Vessels" tab from the top navigation bar.
- 2 The website will show both tabular data and the map view as standard, but you can easily remove or expand the map using the buttons in the top right.
- 3 Depending on your subscription type, the new platform also allows you to export data (up to 1000 rows of data), into Excel.
- The map view is automatically zoomed out, but you can easily focus in on your areas of interest by double clicking on the map, or using the zoom button in the bottom right of the map view.
- You will notice the map clusters vessels, showing the number of vessels in a certain area. This allows you to see traffic density and improves the performance of the site. You can choose to decluster the vessels in your view and also select to see vessel names.

NB. This functionality is only available when there are less than 500 vessels in your current view.
